

Configuring iOS Devices (iPhone, iPad, Etc.) for IMAP on Exchange 2010

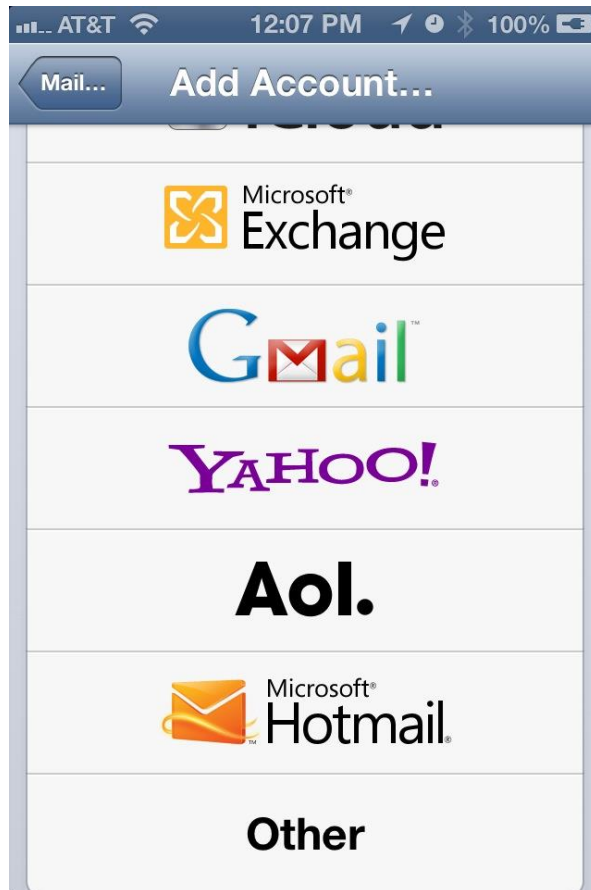

Updated 6/11/2013

The following instruction set will configure your iOS device to connect to your Exchange mailbox via the IMAP Protocol. IMAP connections are for E-mail only. Calendar and contact synchronization is not available in this configuration.

1. On your iOS device, click Settings, then “Mail, Contacts, Calendars”

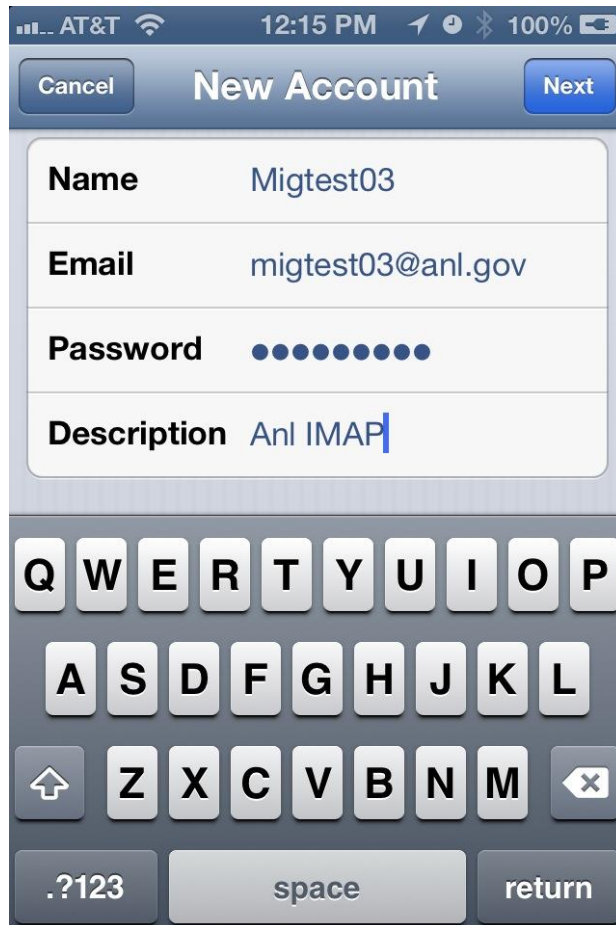

2. Choose "Other" . If you already have a mailbox set up, choose "Add Account" and then "Other".

3. Choose "Add Mail Account"

4. Enter your Name, email address, and ANL domain password, and Description

The image shows a screenshot of an iPhone's 'New Account' setup screen. The status bar at the top displays 'AT&T', signal strength, Wi-Fi, the time '12:15 PM', location services, Bluetooth, and '100%' battery. The form has a blue header with 'Cancel' and 'Next' buttons. The fields are: 'Name' with 'Migtest03', 'Email' with 'migtest03@anl.gov', 'Password' with ten blue dots, and 'Description' with 'Anl IMAP'. A keyboard is overlaid at the bottom.

Field	Value
Name	Migtest03
Email	migtest03@anl.gov
Password	••••••••••
Description	Anl IMAP

5. Choose IMAP, Then enter the incoming and outgoing server information provided below
