

Removing Zimbra and Adding Exchange to Thunderbird

Updated: 7/15/13

The instructions outlined in this document will remove your Existing Zimbra mailbox connection from your Thunderbird profile and add your Exchange mailbox to it.

Please note that most settings such as message rules, mailbox permissions, and other customizations do not migrate between Zimbra and Exchange and may have to be recreated once you connect to your new mailbox. It is advised that you record any settings that you would like to retain before proceeding so they can be replicated.

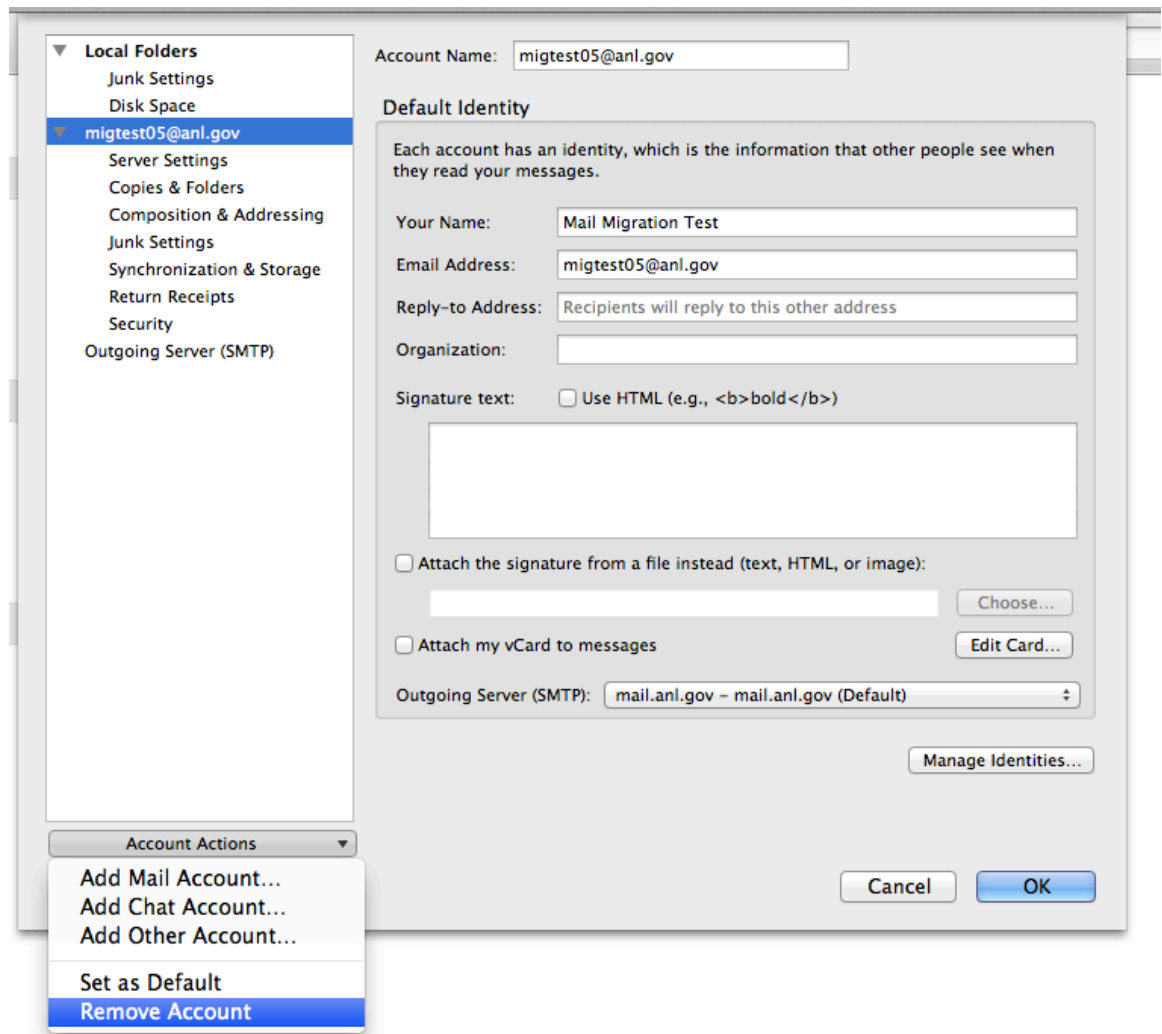

If you have any message rules or filters configured within Thunderbird, you may want to export them before you begin so they can be re-imported after you set up your new mailbox. Instructions for exporting and importing your Thunderbird message rules can be found in the Email Services How-to section, or by referencing the following link.

https://wiki.inside.anl.gov/wiki_inside/images/a/a2/Exporting_and_Importing_Message_Rules_in_Thunderbird.pdf

1. Open Thunderbird and choose "Account Settings" from the "Tools" menu.

2. Highlight your Zimbra account in the Account list, then choose “Remove Account” from the “Account Actions” menu below

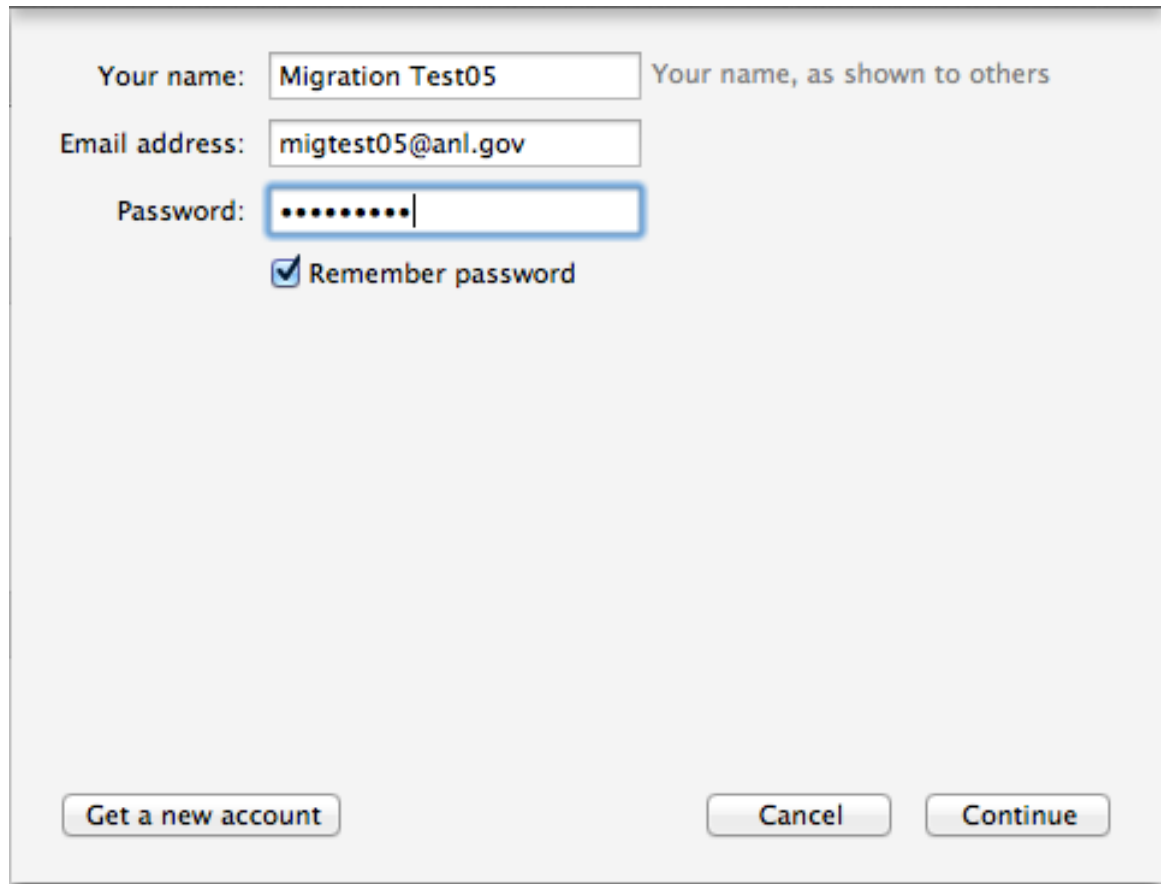

3. When asked to confirm account removal, click “OK”

4. From the "Account Actions" menu, choose "Add Mail Account..."

5. Enter your account information. In the “E-mail Address” field, enter your username in the format “user@anl.gov. This should be your ANL domain user name (i.e. The account you use to access the Inside Argonne Portal). Enter the appropriate password in the password field. Click “Continue” to move on.

A screenshot of a web form for account creation. The form has a light gray background and rounded corners. It contains three input fields: 'Your name' with the value 'Migration Test05', 'Email address' with the value 'migtest05@anl.gov', and 'Password' with a masked password of ten dots. Below the password field is a checked checkbox labeled 'Remember password'. At the bottom of the form are three buttons: 'Get a new account' on the left, and 'Cancel' and 'Continue' on the right.

Your name: Your name, as shown to others

Email address:

Password:

Remember password

- Thunderbird will attempt to discover server settings automatically. When you are presented with this screen, click “Manual Config”

Your name: Your name, as shown to others

Email address:

Password:

Remember password

Configuration found by trying common server names

IMAP (remote folders) POP3 (keep mail on your computer)

Incoming: IMAP, mail.anl.gov, STARTTLS

Outgoing: SMTP, smtp.anl.gov, STARTTLS

Username: migtest05

7. Change the IMAP port to 993, and verify the rest of the settings are consistent with the screen shot below. Click “Done”. If “Done” is greyed out, click “Re-test”, then re-verify the settings and click “Done”.

Your name: Your name, as shown to others

Email address:

Password:

Remember password

Configuration found by trying common server names

	Server hostname	Port	SSL	Authentication
Incoming:	<input type="text" value="mail.anl.gov"/>	<input type="text" value="993"/>	<input type="text" value="SSL/TLS"/>	<input type="text" value="Normal password"/>
Outgoing:	<input type="text" value="smtp.anl.gov"/>	<input type="text" value="587"/>	<input type="text" value="STARTTLS"/>	<input type="text" value="Normal password"/>
Username:	<input type="text" value="migtest05"/>			

8. Click "Outgoing Server(SMTP)". Highlight the server labeled "smtp.anl.gov" and click "Set Default".

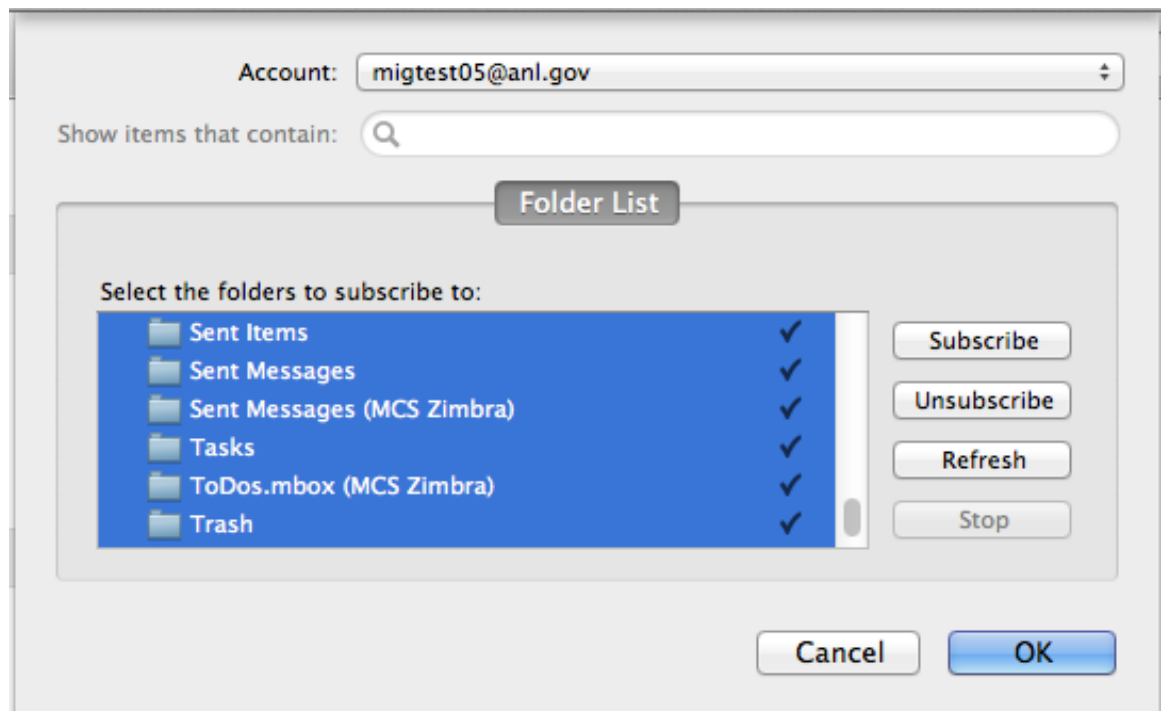

9. Highlight the server labeled “zimbra.anl.gov” and click “Remove”. Click Yes to confirm the removal, then “OK” to exit Account configuration.

10. Your inbox will begin synchronizing. If you have additional mail folders you would like to Download to thunderbird, highlight your account in the folder list and choose “Manage Folder Subscriptions”.

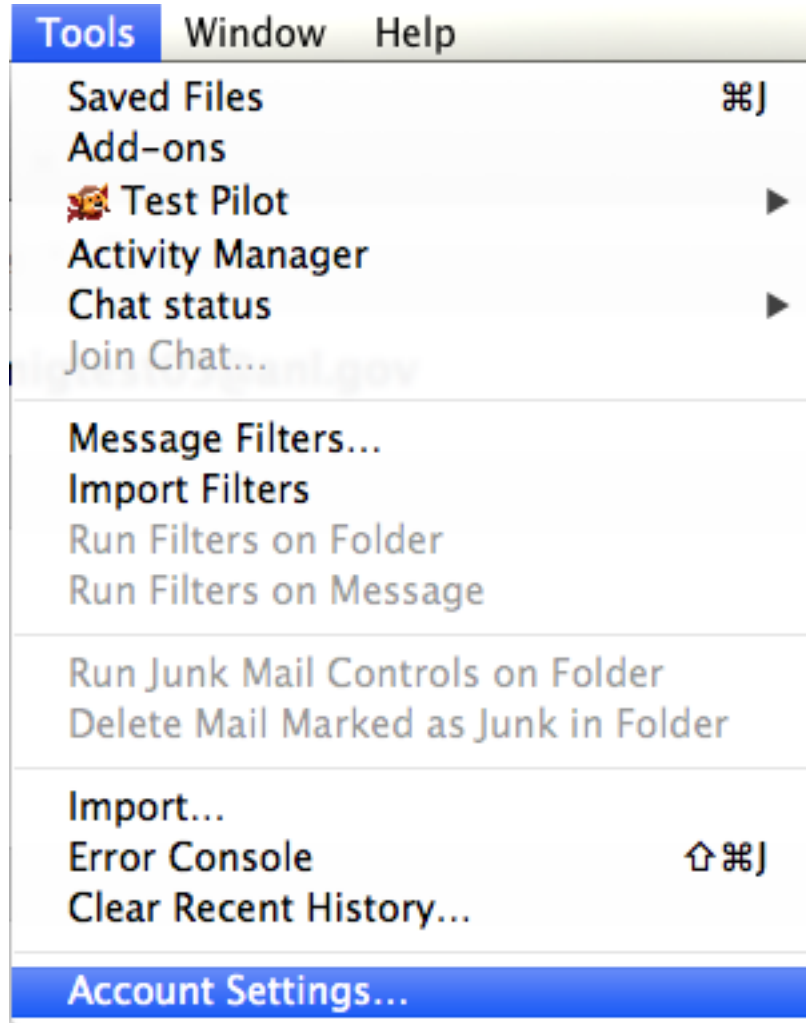

11. Highlight the folders which you would like to appear in Thunderbird. You can select multiples by holding down the Shift or Ctrl key while you select. Click "Subscribe" to subscribe to the selected folders, then click "OK".

12. You may need to close and re-open Thunderbird to get all of the folders to reappear. If you receive a notification that authentication failed, re-enter your password when prompted to do so.

13. From the “Tools” menu, choose “Account Settings”

14. Choose “Server Settings”, then change your “When I delete a message” Folder settings from “Trash” to “Deleted Items”. If you do not see “Deleted Items” as an option, refer back to steps 10 and 11 to make sure you have subscribed to the “Deleted Items” folder.

15. Click OK to exit Settings and complete your Thunderbird Setup
